

Call for Papers: Special Issue of Earth, Planets and Space (EPS) “the 2008 Wenchuan Earthquake”

We now invite you to the special issue of EPS for the great Wenchuan earthquake on May 12, 2008, in Sichuan Province of southwest China, one of the most devastating earthquakes in Asia since recent years. The special issue welcomes any papers related to this event as well as its aftershock sequence. Since this event is closely related to previous seismic activities in the north-south seismic zone in west China and the interaction between Indian and Eurasian plates, studies on the events in the past in this region as well as the geodynamics and geophysics of the Indian-Eurasian plate boundary will also be included. We plan to accept only papers of the ‘letter’ style for this special issue in order to publish scientific results on these events promptly, that is, letter should not exceed 4 pages in print. Note that EPS accepts only original research manuscripts, thus review papers will not be considered.

Contributors to this special issue should submit their papers to the EPS editorial office either by post or by e-mail (eps@terrapub.co.jp), following the instructions for regular EPS ‘letter’ submission. For details, please visit the following web page:

<http://www.terrapub.co.jp/journals/EPS>, and click on “Information for Contributors.”

Please fill and attach two forms (forms A and B) as you find in this web page with your manuscript upon submission. Please make sure to designate Special issue for “Wenchuan Earthquake” in form B.

Please state “For Special issue for the 2008 Wenchuan Earthquake” clearly in the covering letter that accompanies the submission. We encourage electronic submissions. After papers are accepted, the authors will receive instructions for the final manuscript from the editorial office. The deadline for manuscript submissions for this special issue is 10 October 2008. This special issue will hopefully be published in early 2009.

For more information on this special issue, please contact the corresponding editor (Yuzo Ishikawa, catfish@wa2.so-net.ne.jp); questions on manuscript preparation should be addressed to the EPS editorial office.

Note: EPS accepts manuscripts of original research contributions only, and so-called “review papers” will not be accepted. EPS will review all the manuscripts before the publication.

Guest Editors: Chuanzhen Zhu, Institute of Geophysics, CEA, China
Zhongliang Wu, Institute of Geophysics, CEA, China
Teruyuki Kato, Earthquake Research Institute, The University of Tokyo, Japan
Yuji Yagi, Tsukuba University, Japan
Yuzo Ishikawa, Kakioka Magnetic Observatory, JMA, Japan
