

Call for Papers: Special Issue of Earth, Planets and Space (EPS) Cosmic Dust: Its Formation and Evolution

This issue of EPS will be devoted to the session “Cosmic Dust: Its Formation and Evolution” of the AOGS 2008 meeting held in Busan, South Korea. It is meant primarily to contain papers presented at this particular session of AOGS 2008, but it is open to submission of papers from other authors, following the regular EPS submission procedures. Contributions should discuss any aspect of cosmic dust. All kinds of cosmic dust such as intergalactic dust, interstellar dust, circumstellar dust, cometary dust, asteroidal dust, interplanetary dust, circumplanetary dust, stellar nebular condensates, presolar grains, interplanetary dust particles (extraterrestrial stratospheric particles), micrometeorites (polar ice particles), meteoroids, meteors, and regolith particles are the subject of discussion.

All submitted papers go through a peer review process, wherein experts review, recommend, or reject the paper for publishing. Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Papers must be submitted to the EPS editorial office. Electronic submissions by e-mail to eps@terrapub.co.jp are encouraged, but authors who meet any difficulties with electronic submissions could submit a hard copy by post. For details, please visit the following web page:

<http://www.terrapub.co.jp/journals/EPS> and click on “Information for Contributors”.

The cover letter should mention “Submitted to the Special Issue: Cosmic Dust”. After papers are accepted, the authors will receive instructions for the final manuscript from the editorial office. The deadline for manuscript submissions is 31 July 2008. This special issue will hopefully be published in December 2008.

For more information on this special issue, please contact the corresponding editor H. Kimura (hiroshi_kimura@lowtem.hokudai.ac.jp); questions on manuscript preparation should be addressed to the EPS editorial office.

Note: EPS accepts manuscripts of original research contributions only, and so-called “review papers” will not be accepted.

Guest Editors: Hiroshi Kimura, Hokkaido University, Japan
Masateru Ishiguro, Seoul National University, Korea
Ludmilla Kolokolova, University of Maryland, USA
Aigen Li, University of Missouri-Columbia, USA
Torsten Poppe, Technische Universität Braunschweig, Germany
Keiko Nakamura-Messenger, NASA/Johnson Space Center, USA
